SKILLS

Ruby, Ruby on Rails, JavaScript (ES6), jQuery, React.js, Redux, SQL, Git, HTML5, CSS3

PROJECTS

PinIt   Live Site | GitHub

Developed a Single page app in React/Redux supported by a Ruby on Rails backend, devised to emulate Pinterest.

- Successfully stores uploaded files to Amazon Web Services S3 cloud storage which can be accessed via a reference on the backend PostgreSQL database.
- Utilized Redux to conditionally render modals & dropdowns to keep behavior predictable.
- Frontend communicates with backend via a RESTful Rails API.
- Implemented infinite scroll/lazy loading to index feed to optimize loading time

Return of Bass   Live Site | GitHub

A vanilla JavaScript platform run and jump game

- Follows object oriented programming principles and accurately calculates collision detection between objects
- Sprites smoothly drawn onto HTML5 canvas from a spritesheet through accurate x, y coordinates and accurate width and height proportions
- Custom built physics engine that mimics the effects of friction and gravity

DOMinance.js   GitHub

A lightweight DOM manipulation library.

EXPERIENCE

Store Operator

SMX, Google-Express   Aug 2016 - Aug 2017

- Work individually or as a group to pick, pack, and transport items to be delivered to customers homes.
- Used Digital Applications to view online store orders and match item to store products.
- Pick items accurately, in the correct quantity and within the time limit.
- Pay for items in self check out and proceed to packing items.
- Pack items and hand off to subcontractors who deliver packages to customers homes.

Para-transporter

MV Transportation   Mar 2016 - Aug 2016

- Receive list of passengers when arriving at job site. Follow schedule and pick up passengers and deliver them to their destination within the set time schedules.
- Make multiple pick up and drop offs as requested.
- Help disabled customers off and on vehicle safely and ensure their arrivals.

EDUCATION

App Academy (November 2017 - February 2018)

- Teaches full-stack web development: Rails, SQL, JS, React, TDD, algorithms, design patterns, and programming best practices
- Rigorous 1000-hour program that accepts < 3% of all applicants
